Our new CVB6000 covert tree stump series is weatherproof for outdoor operations. This concealment is great for ICE or drug task forces. It could also be used by game wardens for uncovering illegal dump sites and poachers. These cameras are so convincing that you might have trouble recovering the units after you place them. With your choice of hard wired or wireless you can either have permanent camera site or drop and go for quick surveillance operation. Call us for your custom configuration. We can add DVR's or VCR's to the unit for an all in one concealment.
