

Advanced H.264 Mobile Digital Video Recorder

DVR4024M

Perfect for vehicle applications

The DVR4024M mobile DVR is ideal for advanced mobile applications, and features the latest H.264 compression technology for longer record times and DVD quality video. Our feature packed DVR includes video watermarking, network capabilities, alarm contacts and USB offload. The six-fold operation allows users to remotely access, control, backup, record, playback and live view their mobile digital video recorder. Other features include event and time-lapse recording, intelligent motion detection with programmable area and sensitivity and remote access through a mobile phone or PDA. Users also can playback and search by time or event such as alarm, motion, video loss, acceleration and speed.

KEY FEATURES

- » Remotely access mobile DVR via mobile phone or PDA
- » Video records and plays back at Full D1, Half D1 and CIF resolutions
- » Includes video watermarking, network capabilities, alarm contacts and USB offload
