

Single Camera Digital Wireless Video Link

Send wireless video up to 600 feet line of sight with digital 2.4GHz technology

WLS2404D

Based on our best selling wireless video and audio links, the MVL10 series, our new MVL10D uses advanced digital technology to overcome common interference issues found in the popular 2.4GHz band from devices such as cordless phones or wireless routers. These wireless video links can transmit digital video and audio signals up to 600 feet line of sight and are ideal for home and small business applications. Our digital wireless video link comes with power supplies, instructions, a 1 year warranty and a 30 day money back guarantee.

KEY FEATURES

- » MPEG-4 video compression, G.721 audio compression and D1 real-time transmission
- » 2.4GHz wireless mode (up to 5Mbps)
- » 13 channel adjustable
